# BAKHTIAR SABIR

Full-Stack MERN + AI Developer · ERP Integration Intern · Open to Work

bakhtiar.sabir025@gmail.com | +92 345 2473995 | bakhtiarsabir.vercel.app | Karachi, Pakistan

## PROFESSIONAL SUMMARY

Final-year Computer Science student at NED University (graduating June 2026) and a Full-Stack MERN developer with hands-on experience shipping AI-integrated web applications and working inside enterprise ERP systems. Built 2 production-grade deployed projects featuring AI APIs, real payment systems, and real-time functionality. Completed a professional internship at Systems Limited — Pakistan's top IT firm — on Microsoft Dynamics 365 F&O. One of very few fresh graduates with both full-stack development skills and real ERP experience.

## PROFESSIONAL EXPERIENCE

**ERP Integration Intern** · **Systems Limited** *Mar 2025 – Apr 2025*

*Enterprise Services Division · Microsoft Dynamics 365 Finance & Operations*

- Customized business logic and data processing routines using X++ (Dynamics 365's native language), delivering module-level enhancements aligned with real client requirements.
- Designed and developed 5+ SSRS financial reports used by the finance team for monthly enterprise client reporting, ensuring accurate data presentation for stakeholders.
- Gained deep exposure to large-scale ERP workflows directly transferable to SAP and other enterprise environments — a rare skill for a fresh graduate.
- Collaborated within a professional enterprise software team practicing real-world Agile workflows and client-facing documentation standards.

**IT Support Intern** · **KDA – Karachi District Authority** *Jun 2025 – Jul 2025*

*Government IT & Administrative Operations*

- Supported IT operations of a major government authority managing thousands of daily administrative transactions across multiple departments.
- Streamlined digital workflows by assisting with inter-departmental coordination and technical task management at government scale.
- Gained practical understanding of public sector IT infrastructure, documentation standards, and large-scale organizational operations.

## EDUCATION

**B.S. Computer Science (BSCS)** · **NED University of Engineering & Technology** *2022 – Jun 2026*

*Currently in 8th Semester · Graduating June 2026*

- Coursework: Software Engineering, DSA, OOP, Database Systems, Computer Networks, OS.
- **Koderz Combat Award (2022)** — Won university-level coding competition sponsored by OctDaily.

**Pre-Engineering (Intermediate)** · **Govt. College for Men Nazimabad** *2020 – 2022*

*Percentage: 80%*

**Matriculation** · **The Smart School** *2018-2020*

*Percentage: 80%*

## PROJECTS

### ShopSphere — AI-Powered Full-Stack E-Commerce Platform — *2025*

*React · Node.js · Express · PostgreSQL · Stripe · Google Gemini API · Tailwind CSS | Live: shopsphere-client-e-commerce-websit.vercel.app*

- Built a production-grade e-commerce platform from scratch featuring AI product recommendations (Google Gemini API), Stripe payment gateway, complete admin dashboard with CRUD, user authentication, and order management.
- Designed and implemented a fully documented REST API with Node.js and Express, connected to a PostgreSQL relational database — handling 10+ API endpoints across products, users, and orders.
- Delivered a responsive, modern UI using React.js and Tailwind CSS, applying software engineering best practices throughout the full development lifecycle.
- Independently handled full-stack ownership: database schema design → REST API → frontend → Vercel deployment.

### Pinterest Clone — Real-Time Full-Stack Social Media Platform — *2024*

*React · Node.js · Express · MongoDB · Socket.io · Redux · Cloudinary · JWT · TypeScript*

- Developed a feature-rich Pinterest-style platform with real-time notifications and updates via Socket.io — a skill explicitly required in senior MERN developer job postings.
- Built a complete REST API with 6 route modules (auth, users, pins, boards, search, notifications) and JWT cookie-based authentication with secure session management.
- Integrated Cloudinary for production-grade image upload and storage, Redux for global state management, and TypeScript for type safety across the codebase.
- Architected a dual-server setup: React (Vite) frontend on port 3000 proxied to Express API on port 5000 — demonstrating real deployment architecture knowledge.

## TECHNICAL SKILLS

| | |
|---|---|
| **Frontend** | React.js · Next.js · Tailwind CSS · HTML5 · CSS3 · Redux |
| **Backend** | Node.js · Express.js · REST API Design · Socket.io |
| **Databases** | PostgreSQL · MongoDB · MySQL · Mongoose ORM |
| **ERP & Enterprise** | Microsoft Dynamics 365 F&O · X++ Customization · SSRS Reports |
| **AI & Payments** | Google Gemini API · OpenAI-compatible APIs · Stripe · Cloudinary |
| **Languages** | JavaScript (ES6+) · TypeScript · Python · C · C++ · C# · X++ |
| **Tools** | Git · GitHub · Postman · VS Code · Docker (learning) · Vercel · Render |
| **CS Concepts** | OOP · Data Structures & Algorithms · REST Architecture · JWT Auth · Real-Time Systems |

## ACHIEVEMENTS & AWARDS

- Koderz Combat Award (2022): Won university-level competitive coding competition sponsored by OctDaily against peers across multiple programming challenges.
- Hangman Game Certificate (2023): Recognized for technical implementation and demonstration quality in a university project showcase.
- 2 Live Deployed Projects: ShopSphere (AI e-commerce) and Pinterest Clone (real-time social platform) — both production-grade, deployed, and publicly accessible.
